HB 1508-FN - FISCAL NOTE

AN ACT terminating state participation in the common core educational standards.

FISCAL IMPACT:

The Department of Education states this bill, **as introduced**, may increase state expenditures by an indeterminable amount in FY 2014 and each year thereafter. There will be no impact on state, county, and local revenues, or county and local expenditures.

METHODOLOGY:

The Department of Education states this bill requires the state board of education to terminate all plans, programs, activities, and expenditures relative to the implementation of the common core state educational standards, including assessments and instruction based upon such standards. The Department states it is unclear if the intent of this legislation is to return to the old grade level expectation standards in place three years ago, or if it is to develop all new standards. The Department states if the intent is to develop and implement a new assessment it may need to contract with a testing company in order to do so. For informational purposes, the state's current cost for the New England Common Assessment Program (NECAP) is approximately \$3,000,000 per year, however new development costs and support may cost an additional \$1,500,000 to \$2,000,000 per year. The Department states the Elementary and Secondary Education Act requires a state to have standards and assessments based on those standards in English language arts and mathematics, however, the Department would need clarification on the intent of this bill in order to assess its compliance with federal law.
