Good Evening,

I am a registered voter from East Kingston. I have been researching Common Core standards for almost a year and I feel **these standards are not good enough for American children**. The standards imposed are in-fact **designed to allow more children to graduate**. It gives the children an **inadequate level of education** for Science, Technology, Engineering and Math careers. The "WorkReady" "CareerReady" goals of the program are **not going to keep America the super power that it once was**. Cutting edge technology, medical and engineering **careers are going to be held by countries other than ours UNLESS WE CHANGE FROM CORE STANDARDS**. Bring the educational goals back to New Hampshire. We know what is best for our children.

Please support HB 1508.

Thank you!

Deb Hobson
East Kingston
