Girard
SCHOOL BOARD

"I have seen district administrators act with intention to withhold information not just from the parents and the public, but also from the school board to which it answers. Knowing what I know after a quarter century following and participating in local government and media, I know what questions to ask and when to ask them. Transparency, public dialogue, parental rights, administrator accountability, local control and common sense are my agenda. For these reasons and more, I ask for your vote on November 3rd. Thank you!"

If elected, I will fight for:

More teaching, less testing.

Prior parental notification and consent for controversial, non-academic lessons, behavioral surveys, state assessments & more.

Real academic excellence, not so called, undefined "21st Century Skills."

Evaluation of all programs involving federal or other funds where the total cost exceeds the revenue received.

Inviting parents to be part of the process, from curriculum to extra curricular offerings and everything in between.

Repealing the policy that requires children with live head lice to be in school and prohibits teachers or school nurses from notifying parents so they check to see if their kids have been infected.

Expanding local control and diminishing the influence of federal and state bureaucrats on the Manchester School District.

Responsible budgeting that honors the city's Tax Cap, holds administrators accountable and focuses on improving educational opportunities for students.

Vote on Tuesday, November 3rd!
